Schlüter®-KERDI-LINE: Elegant drainage

Linear drainages bring elegance and functionality to floor-level showers. Schlüter®-KERDI-LINE is a complete system that includes all components for draining floor-level shower areas. My Schlüter®-KERDI-LINE adds a personal touch: Customers can choose to add an individual engraving to the grate and/or frame of the drainage channel.

- ✓ Up to 14 channel lengths.
- ✓ Low assembly heights.
- ✓ Complete sets with waterproofing collar.
- ✓ Four different channel covers.
- ✓ Stainless steel grates and frames individually customisable.
- ✓ Flexibly adjustable to tile thicknesses.
- ✓ Extensive assortment, including tapered profiles and splashguard profiles.

Schlüter®-KERDI-LINE-H

Schlüter®-KERDI-LINE-H is a complete set for linear floor level showers with a horizontal drain. It can be universally used for intermediate installation in floor or at wall areas. The perimeter of the channel body consists of an adhesive flange that is coated with a collar made of Schlüter®-KERDI. It ensures the reliable connection of the channel body to the bonded waterproofing assembly, both in the floor area and on upright walls.

(Product data sheet 8.7)

Set components:

- A Corner seal
(for lateral wall connection)
- B Two part odour trap
- C Channel body with waterproofing collar
- D Drain body
- E Drain pipe
- F Channel support
- G 40 mm adaptor
(only for KERDI-LINE-H 40)

Technical data:

Drain: DN 40 / DN 50
 Drain capacity: 0.5 l/s/ 0.6 l/s
 Assembly height: 78 mm / 97 mm
 Width of cover including frame: 74 mm
 Lengths: 50 to 180 cm in increments of 10 cm

Schlüter®-KERDI-LINE-F

Schlüter®-KERDI-LINE-F is a complete set for linear, floor level showers with horizontal drain. It can be universally used for intermediate installation in floor or wall areas and is particularly well suited for restoration and modernisation projects because its low assembly height of just 60 mm. A collar made of Schlüter®-KERDI is pre-adhered to the adhesive flange of the channel body for reliable connection to the bonded waterproofing assembly.

(Product data sheet 8.7)

Set components:

- A Corner seal
(for lateral wall connection)
- B Channel body with waterproofing collar and channel support
- C Lip seal
- D Drain body with odour trap

Schlüter®-KERDI-LINE-A/-B/-C

Schlüter®-KERDI-LINE are insertion frames of brushed stainless steel with designer grate covers that match the Schlüter®-KERDI-LINE channel bodies. The insertion frame is seamlessly height adjustable to accommodate covering materials in thicknesses from 3 to 25 mm. Designer grate A, B and C are available as design options.

Schlüter®-KERDI-LINE-A sets

Schlüter®-KERDI-LINE-A sets are complete sets for linear floor-level showers with a horizontal drain. The linear drain set can be positioned centrally or at the perimeter of the shower area. A collar made of Schlüter®-KERDI is pre-adhered to the flange on the surround of the channel body, and ensures the reliable connection of the channel body to the bonded waterproofing assembly, both in the floor and in wall areas. The set also includes a brushed stainless steel design grate Schlüter®-KERDI-LINE-A to match the channel bodies.

(Product data sheet 8.7)

Set components:

- A Grate and frame combination with design grate A
- B Corner seal (for lateral wall connection)
- C Two part odour trap
- D Channel body with waterproofing collar
- E Drain body
- F Drain pipe
- G Channel support
- H 40 mm adaptor

Schlüter®-KERDI-SHOWER-LCS

Schlüter®-KERDI-SHOWER-LCS is a set with a two part sloped tray with a 2% slope and a pre-adhered coating of Schlüter®-KERDI for the direct installation of tiles in floor level showers and for the connection of the folded parts of the sloped tray. It is attached to the previously installed linear drain Schlüter®-KERDI-LINE in the wall area, with a precise fit over the previously installed levelling board, included in the set.

(Product data sheet 8.8)

A prefabricated fitting is included to cover drain pipes that protrude over the length of the channel.

Schlüter®-KERDI-SHOWER-LS

Schlüter®-KERDI-SHOWER-LS is a sloped tray with a 2% slope and a pre-adhered coating of Schlüter®-KERDI for the direct installation of tiles in floor level showers and for the connection of the folded parts of the sloped tray. It is attached to the previously installed linear drain Schlüter®-KERDI-LINE in the wall area, with a precise fit over the substructure supplied at the corresponding construction site.

(Product data sheet 8.8)

Schlüter®-KERDI-SHOWER-LS

sloped tray with Schlüter®-KERDI for installation in wall transition areas

L x B = cm	H = mm	Art.-No.	€ / U.	P = Unit
100 x 100	42	KSL 1000 S	117.60	10
140 x 140	50	KSL 1400 S	174.81	10

Note: Use Schlüter®-KERDI-KERS (see page 97) for secure waterproofing in the corner area.

Matches Schlüter®-KERDI-LINE-H and -KERDI-LINE-V – not suitable for Schlüter®-KERDI-LINE-F.

Schlüter®-KERDI-SHOWER-BSLS

Schlüter®-KERDI-SHOWER-BSLS is a sloped tray for floor level showers with a 2% slope. It is attached to the previously installed linear drain Schlüter®-KERDI-LINE in the wall area, with a precise fit over the substructure supplied at the corresponding construction site. It is suitable for the installation of heated or unheated screeds, and preferably Schlüter®-BEKOTEC screeds, in the shower area.

(Product data sheet 8.8)

Schlüter®-KERDI-SHOWER-BSLS

Note: Use Schlüter®-KERDI-KERS (see page 97) for secure waterproofing in the corner area.

Matches Schlüter®-KERDI-LINE-H and -KERDI-LINE-V – not suitable for Schlüter®-KERDI-LINE-F.

Schlüter®-KERDI-SHOWER-LC

Schlüter®-KERDI-SHOWER-LC is a set with a two part sloped tray with a 2% slope and a pre-adhered coating of Schlüter®-KERDI for the direct installation of tiles in floor level showers and for the connection of the folded parts of the sloped tray. It is attached to the previously installed linear drain Schlüter®-KERDI-LINE in the centre area, with a precise fit over the previously installed levelling board, included in the set.

(Product data sheet 8.8)

Schlüter®-SHOWERPROFILE-S

Schlüter®-SHOWERPROFILE-S is a triangular profile made of a brushed stainless steel flat profile with 2% slope for covering the sloped edges of floor level showers. A fleece fabric is laminated on the reverse of the profile for bonding with the tile adhesive. A matching hard PVC support profile is available in different heights and features a U shaped installation channel. The triangular profile can be shortened as necessary on the short and/or long side to accommodate height adjustment. The triangular profile can be used on the left or right side of the floor transition or below the tiles of a lateral wall.

2 % = 2 mm / 10 cm

Note: Tapered profiles with higher support profiles in the heights 15, 18 and 22 mm are available upon request for greater tile thicknesses.

Schlüter®-SHOWERPROFILE-R

Schlüter®-SHOWERPROFILE-R is a two part wall transition profile for covering the wall area exposed due to the use of a wedge with a line drainage channel. The visible surface of the profile consists of brushed stainless steel. A fleece fabric is laminated the reverse for bonding with the tile adhesive. Due to the two part design, Schlüter®-SHOWERPROFILE-R can be seamlessly adjusted to any height between 23 and 45 mm (available in two versions).
