Italian Tile & Stone
tiles.ie

ORIGINAL

Two souls, one project.

ORIGINAL means rediscovering the seductive beauty of timeless materials and using them in very diverse architectural contexts. The fact that the collection comes in the two surfaces LUX⁺ and SABLÈ sets it apart from traditional marble-effect clichés and allows for freedom of experimentation. As part of a design approach that includes the latest products in the ITALIAN TILES AND STONE catalogue, it is ideal for a wide array of solutions with an utterly contemporary design.

ORIGINAL LUX⁺

glossy surface

The exclusive LUX⁺ technology reproduces the elegant sheen of polished marble on large-format porcelain tiles that are easy to install and are designed for use on floors and walls in up-market indoor spaces.

LUX FOR ELEGANCE SENSI LUX⁺ lends elegance and style to floors and walls, allowing for enormous creativity in terms of installation patterns and colour combinations.

LUX FOR LUXURY The appeal of selected marble slabs is now an accessible privilege, while the graphic variability and rich surface patterns lend prestige and an impeccable finish to any space.

LUX FOR GLOSS LUX⁺ surfaces stand out for their high gloss level and aesthetic excellence while maintaining exceptional resistance to staining and foot traffic as well as practicality of use.

ORIGINAL SABLÈ

stone surface

Those looking for a more natural and spontaneous style can rediscover the material appeal of sandblasted marble thanks to SENSI SABLÈ, a new marble-look concept that expands the product's application potential.

SABLÈ FOR NATURAL APPEAL Thanks to the use of cutting-edge digital decoration technologies, SABLÈ surfaces provide an extremely realistic simulation of fine sandblasting treatment and display the quartz inclusions present in the veins of original marble.

SABLÈ FOR WARMTH SENSI SABLÈ conveys the typical warmth of an authentic material. The sandblasting treatment does not entirely transform the original essence of the block of marble, allowing its true stone nature to shine through.

SABLÈ FOR VERSATILITY The soft-touch satin-finish surfaces are ideal for all interior applications as well as for new and surprising stylistic combinations.

ORIGINAL LUX⁺

In general, the majority of the ceramic tiles presents a compact surface easy to clean, as there are no areas where dirt can attach or get stuck. When the surface is polished, the situation changes and often there is a drastic reduction of the cleanability accompanied by a high sensitivity to acid attack. This phenomenon, the more evident the more it is clear the tile, is due in large part to the appearance of microporosity in which solid dirt, or not soluble in water or in detergents dirt, get stuck and progressively turns the tile surface into gray. LUX⁺, a new concept of ceramic surface finish with which, through a combination of peculiar application techniques and special polishing tools, you can get the complete saturation of the porosity.

LUX⁺

E×TRA GLOSSY
E×TRA RESISTANT

MORE GLOSSY

The finishing LUX⁺ is able to increase the level of surface glossiness of more than 100 gloss points.

MORE RESISTANT

The LUX⁺ finishing increases the surface stains resistant. This is to be understood both as cleanability of the surface to treads and stains of various kinds, both as acid and wear resistance determined by the traffic over the time.
